EDUCATION

Maastricht University - B.S. in Computer Science | Maastricht, NL

Sep 2023-Jun 2026

WORK EXPERIENCE

Software Engineer Intern | Qogita

Jul 2025 - Jan 2026

- Engineered scalable backend services using Python/Django REST Framework, strengthening system reliability and data accuracy across multiple high-impact projects.
- Collaborated with product, design, and frontend teams to deliver internal tools and APIs that improved inventory management, supplier pricing insights, and overall operational efficiency.

Full Stack Engineer Intern | AQI Travel

Jan 2025-Jun 2025

- Designed and implemented a full-stack GPT-powered travel assistant with multi-turn memory, structured restaurant data integration, and intelligent recommendation handling.
- Developed the full frontend in Svelte, TypeScript, and CSS, building a clean, responsive UI for the travel assistant.
- Created the backend in Python to connect the assistant with restaurant data, APIs, and user memory logic.

Intern - Junior Software Engineer | Azul

Jun 2024- Aug 2024

- Test Failure Classification Project: Managed the classification of 200,000 test failures based on detailed logs and stack traces, helping to clarify the types of issues encountered.
- Data Preparation for Machine Learning: Oversaw the markup of extensive test failure data to optimize the training of an open-source machine learning model, enhancing its pattern recognition capabilities.
- LLM Model Training: Utilized well-prepared data to train a language learning model, improving its accuracy in classifying software test failures effectively

Game Development Intern | Technologos Research and Innovation Services

Mar 2023 - Sept 2023

- Led cross-functional team for the company's Erasmus project, developing an online environmental board game. Collaborated on gameplay, visuals, enhancing user engagement and learning

PROJECTS

Personal Portfolio Website

- Developed a personal portfolio website with Next.js and framer motion.

AI Agent Training with Custom Sound Sensor

- Applied deep reinforcement algorithms to train agents in Unity 3D environments using ML-Agents Toolkit. Created a custom sound sensor for agents to detect and respond to sound events, improving their awareness and decision-making.

Maastricht Bus-Route Simulator

- Developed "Transitor," a Java-based engine, analyzing socio-economic accessibility in Maastricht through public transit data, highlighting areas for infrastructure improvement.

Tetris Game

- Created a project combining Tetris and the Knapsack Problem to optimize space utilization and decision-making skills.

TECHNICAL SKILLS

- Languages:** Java , Python, HTML/CSS/JavaScript, Typescript, C#, SQL, Svelte
- Tools/Frameworks:** Django, FastAPI, Node.js, Next.js, LangChain, Redis, Celery, Apache Kafka, PostgreSQL, MySQL Workbench, REST APIs, Docker, Git, Maven, MATLAB, Wireshark, Figma, Jira, Microsoft Office, AWS basics, Retool
- Soft Skills:** Problem-Solving, Analytical Thinking, Communication Skills, Team Collaboration, Leadership, Adaptability, Time Management, Vulnerability Assessment
